

APLUS ASERVER

Aplus Aserver is the most powerful COMPUTER SERVER designed for SOHO and as a backup server for small industry. With the friendly web-based interface, users can easily set up a network system for all workstation without MIS help. APLUS ASERVER is easy to install and it has a complete server feature sets such as multi user accessing feature, Remote Replication (It is designed to operate 24x7 without any fan noise at low power consumption for only 14.4W and with non technical & service maintenance needed.)

Create your own Server in the easiest way

The basic purpose of AServer is to allow users to operate application software and to store and share files. Users often concern that their private data or confidential files would be accessed by others. ASERVER allows server manager to create user ID and password, and define the authority and quota for each user. Thus data stored on ASERVER are well protected.

Backup Server with the most professional Aplus auto-backup software

Data & system backup may sound time- and effort-consuming for most users. Aplus Wabackup now brings you the enterprise-class technology to make backup extremely simple and efficient! The most intelligent automatic backup software is provided for users to perform real-time synchronization or schedule backup from ASERVER to backup station.

Remote System Backup

Remote System Backup provides a superior level of data protection. Files can be backed up from Aserver to a remote Aserver via internet broadband connection.

No Fan Design

The fan used inside a device is for the purpose of cooling system, no matter how quiet it is, the fan has to be activated for air ventilation. Somehow, it is inevitable to generate intermittent chirping noise which distracts your work or diminishes your enjoyment. Aserver adapts no fan design approach by using black aluminum case for thermal dissipation. It provides an absolute quiet working environment for you!!

INSTALLATION

Just connect it to a Local Area Network (LAN) Switch / Hub, then locate Aserver working folder, follow by creating a desktop icon. (Workgroup/IP)

MOST COMMON COMPUTER SYSTEM PROBLEMS

1. Workstation can not link to server.
 - Most workstations and servers in business premise are installed by different supplier or technician; due to lack of standardization of product, installation standard & technical procedure.
2. Virus in a computer
 - Most personal computers or workstations can access to internet for daily operation, hence the chances of a computer to be affected by virus is greater.
 - Lack of anti virus prevention program.
3. System hanged or unstable.
 - Virus attacked
 - Faulty or Damage part
 - Device problem
 - Operating Problem.
4. Server problem
5. Backup problem
6. Technical assistance
7. Data lost.
 - Network problem
8. System can not update.
Operator not available.

APLUS ASERVER TS-109 320GIGA BYTES SATA STORAGE

Processor:	SoC 500MHz
Memory:	128MB DDR II RAM, 8MB Flash
HDD Capacity:	320 GIGA SATA
LAN Port:	1 x Gigabit RJ-45 Ethernet port
LED Indicators:	USB, Status, eSATA, HDD, LAN, Power
USB:	3 x USB 2.0, support USB printer, disk, digital camera, pen drive, card reader, USB hub
eSATA:	1 x eSATA port
Buttons:	Intelligent USB auto copy button / Power Button / Reset Button
Alarm Buzzer:	System warning
Form Factor:	Portable desktop
Dimensions:	210(D) x 60(W) x 182(H) mm
Weight:	Net weight: 1.2Kg
Operation Environment:	Temperature 0~35°C / Humidity 0~95% R.H
Power Supply:	External power adapter, 12V, 36W, 100~240V
Power Consumption:	Sleep mode 6.6W / In operation 14.4W
Energy-saving Design:	Fanless, HDD sleep mode / Low power consumption & noise-free
Thermal Solution:	Heat dissipation by aluminum case
Secure Design:	K-Lock security slot for theft prevention / Power cord hook for kicking-off prevention

RSP : RM 2,999.00 (WM) / RM 3,499.00 (EM)

WARRANTY: 12 MONTHS (ONE TO ONE CHANGE)

OPERATING SYSTEM : LINUX
